

Street & Alley Committee Minutes
July 28, 2021

The Street & Alley Committee met on Wednesday, July 28, 2021 at 4:00pm. Present were Andy Kelchen, Steve Knepper, Mayor Greg Staner, Jake Deaver, MSA engineer and the City Administrator, Deanna McCusker.

The main purpose of the meeting was to review storm water on Garfield Street SW and how it affects Grant Street, specifically the intersection at 1st Ave W. We discussed the intakes on 4th and Garfield also. Storm water is going across Garfield and then running down 1st Ave creating a flooding situation at Grant Street & 1st Ave W. The committee decided to relocate the meeting offsite to look at intakes in person. We walked to Garfield Street SW and reviewed the intake and discussed where the storm water runs and if another intake would help alleviate some storm water. The best spot would be just around the corner on 1st Ave W. We then looked at the intakes near Grant Street SW and 1st Ave W and we need to make these intakes wider and more open to help the water to get into the piping. Jake will also review the size of pipe that runs across 1st Ave W on Garfield and Grant to see where more capacity is available. We will talk with a local contractor about altering these storm intakes to hopefully help with the storm water issue.

With nothing further, the meeting adjourned at 4:50pm.

Deanna McCusker, City Administrator

Greg Staner, Mayor
